How many chairs were there in each row?
How many chairs were left over?

Name _____

Question 5

Julio is 4 lb. heavier than Andy. Andy is 5 lb. lighter than Peter. If Peter weighs 39 lb., what is Julio's weight? .

Answer: _____

● Magic Square...

Mrs. Holderman, the math teacher, has given Johnny a special math problem. He must place the remaining numbers on the wall chart so that the sum of each row and column, as well as both diagonals, is the same. Mrs. H. has already spotted Johnny three numbers. How should he position the rest of the numbers to solve the problem?
